

egg demonstration

part 1

salt shaker

investigation 5

density

describe what happens

why does this happen?

our goal is to see if we can change the density of an object like water solutions

find the density of different concentrations of salt water.

$$d = \frac{m}{V}$$

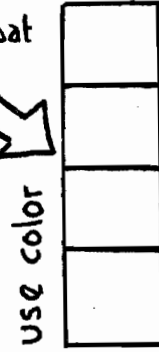

the empty container has a mass of _____ g

if placed in the same container where would they float or sink to?

color	Vol	mass	density
R			
G			
Y			
B			

check to see if you are correct

use color

liquid layers

weather watch

bob

standard 55d, 55e, 55f, 56a, 56b, 56c
