**weather watch**

There will be seven (7) investigations as part of this earth science unit of study on weather.

I will do my best, answer all questions, make a daily journal entry and have my parents look over all my work.

Investigation 1 113

what is weather? 

**K** what I know about weather.

**W** what word you need to know in order to forecast the weather?

**L** what I learned about the weather is on page \_\_\_\_

what other things do you want to know about the weather?

think-pair-share lets define a science word

word	WEATHER
what you think weather means	
what your team thinks weather means	
what the class thinks weather means	

- glossary and index words
- meteorologist
  - weather
  - hurricane
  - weather report
  - coordinates
  - longitude
  - latitude

This reading on weather is homework  
Hand in for a grade

114 Reading - What is weather? Investigation 1

**we**

what

WEATHER is the atmosphere around us. It includes temperature, wind velocity, precipitation, and humidity. Think of the state of the sky as it may be clear and so forth. Ultimate changes call by the sun's variations in energy.

Weather is created by an air mass to be. This, winds also responsible for the clouds and so forth.

Weather is with climate. The of weather. If sky may be pour onto the the weather. Single day. It indicated by sparse vapor. evaporation. the the weather is the direct of.

115 Wonders of Weather - Video Investigation 1

**video** wonders of weather

what surprised you about the weather shown in this video?

what is considered "severe" weather?

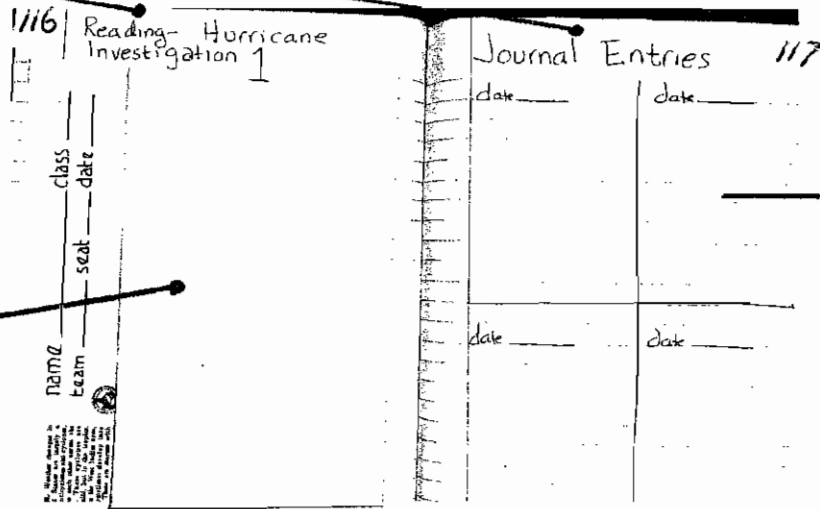

what is a hurricane?

We will watch two (2) videos and write about them in this booklet

- add the words to your glossary and index
- add this unit to your table of contents
